

SREEKANTH M

SDET | Automation Test Engineer | UI & API Automation | CI/CD | AWS
sreekanthmellamputi34@gmail.com | +91 8056904092 | Bangalore

PROFESSIONAL SUMMARY

SDET with 2 years of experience designing and developing scalable UI and API automation frameworks across e-commerce and healthcare domains. Proficient in Java, Python, Selenium WebDriver, and Playwright (JavaScript), with strong expertise in CI/CD integration, AWS EC2-based execution, and cross-browser testing. Experienced in migrating automation frameworks from Selenium to Playwright for faster and more reliable sanity execution. Skilled in REST API validation, framework architecture (POM), Jenkins pipelines, and delivering high-quality releases in Agile environments.

TECHNICAL SKILLS

Programming Languages: Java, Python

Automation & Testing Tools: Selenium WebDriver, Rest Assured, Postman

Test Frameworks: TestNG, JUnit, Cucumber (BDD), PyTest, Robot Framework (Basics)

Automation Concepts: Page Object Model (POM), Test Automation Framework Development, Parallel Execution, Cross-Browser Testing

CI/CD & DevOps: Jenkins, Maven, Git, GitHub, AWS EC2 (Ubuntu)

Testing Expertise: Functional Testing, Regression Testing, Smoke Testing, API Testing, UI Testing

Methodologies: Agile, Scrum

Operating Systems: Windows, Linux

IDE & Development Tools: VS Code, PyCharm, Eclipse, IntelliJ IDEA

WORK EXPERIENCE

Automation Test Engineer | AlgoShack Technologies Pvt Ltd | Aug 2024 – Present | Bangalore

- Developed and maintained scalable UI and API automation frameworks using Java Selenium and Rest Assured.
- Integrated automation test suites with Jenkins CI/CD pipelines for continuous regression execution.
- Contributed to sanity and regression automation, improving test coverage and reducing manual testing effort.
- Implemented robust framework design using Page Object Model (POM) for reusability and maintainability.

Automation Test Engineer | Nexxoft Infotel | Nov 2022 – Jul 2024

- Built automated UI test scripts using Python Selenium with PyTest framework.
- Developed and executed automation suites for sanity and regression testing, improving release efficiency.
- Integrated test execution with CI/CD pipelines for automated validation of builds.
- Performed database validation using SQL to ensure data integrity across applications.
- Collaborated with development teams to identify defects early and improve overall software quality.

PROJECTS

AlgoQA – Automation Testing Platform | Aug 2024 – Present | Bengaluru

Tech Stack: Java, Selenium WebDriver, Rest Assured, Cucumber (BDD), Jenkins, Git, AWS (Ubuntu)

- Designed and developed a scalable UI and API automation framework using Java Selenium and Rest Assured with Cucumber (BDD).
- Implemented BDD framework with feature files, step definitions, and hooks to improve test readability and collaboration.
- Automated key platform modules including Sign-in, Project Management (Create, Clone, Import), Backup & Restore, Scenario Management, and Node Configuration.
- Automated Test Case Generation, Script Generation, and Scenario Recording modules validating dynamic automation workflows.
- Performed end-to-end validation of REST APIs including response validation, status code checks, and data consistency.
- Integrated automation framework with Jenkins CI/CD pipelines for continuous testing during build deployments.
- Executed sanity and regression test suites on AWS EC2 (Ubuntu) for cloud-based validation.
- Generated Cucumber HTML reports and shared execution summaries with stakeholders.
- Improved regression stability and reduced flaky test failures through framework optimization.

VU PACS Diagnostics Viewer – Healthcare Imaging Platform | Nov 2022 – Jul 2024 | Bengaluru

Tech Stack: Python, Selenium WebDriver, PyTest, SQL, Jenkins, Git

- Developed automated UI test scripts using Python Selenium with PyTest for healthcare imaging workflows.

- Designed a scalable automation framework using Page Object Model (POM) for maintainability and reusability.
- Automated core functionalities including user authentication, image navigation, search, and diagnostic report validation.
- Integrated automation suites with Jenkins for continuous testing and automated build validation.
- Executed sanity and regression test suites to ensure application stability across releases.
- Performed database validation using SQL queries to verify backend data consistency.
- Generated execution reports and collaborated with development teams for defect resolution.
- Improved regression coverage and reduced manual testing effort through automation.

KEY ACHIEVEMENTS

- Awarded **Best Employee Award** twice for consistent high performance and contribution to automation framework development.
- Recognized for improving test coverage, optimizing execution time, and enhancing overall QA process efficiency.

EDUCATION

Master of Computer Applications (M.C.A)

Sree Vidyanikethan Institute of Management

2020–2022

Score: 78%
